Subject: Qs (sort of) about Deer Park project
Date: Wednesday, April 03, 2019 2:21:00 PM

Since we haven't been able to catch you in your office:

1. Diane Reese (R6) has requested instrument data reports from us. Larry and I talked and don't feel comfortable providing those yet (they would be included in a final, peer-reviewed data package). None of this data has been peer-reviewed (or "verified") yet. But before I tell her no, I thought I'd check with you first. As an aside, the almost daily requests to interpret our own data while we're receiving/preparing/analyzing/reporting samples every day is becoming cumbersome.
2. We have yet to receive a QAPP or some such other document for this project. I spoke with Angela and before we can report final, reviewed data, we have to have documentation of this project request (typically a QAPP or some document that lists DQOs for the project).
